

Construction Security

Video Security - UNPLUGGED

No AC power! Video security over the mobile network. Instant protection for remote assets. Operates for months on one set of batteries.

- › Affordable
- › Portable
- › Anywhere

Wireless Video Security
where and when you need it.

About £1 million worth of plant and construction machinery is stolen every week in the UK according to Thames Valley Police.

The British Home Office estimate that there were around 100,000 police recorded metal thefts in 2010/11. According to British Transport Police recorded crime data, the levels of copper cable theft have increased rapidly from 2005/06 to 2010/11.

- › Public works
- › Building construction
- › Communication towers
- › Electricity distribution
- › Seasonal rentals

Repair costs and loss of service are much more expensive than the actual cost of copper and stolen materials.

TOTALLY wireless video security

When an intruder is detected, the integrated night vision camera captures a 10 second video of what caused the alarm and sends this over the GSM cell network to a 24x7 monitoring station. Each system can have up to 24 cameras. The entire system will operate up to two years on one set of batteries.

Protect your remote facilities!

Videofied a complete wireless video security system :

- › Outdoor cameras protect your construction sites, equipment...
- › Indoor cameras protect your installed services (pipes or copper cables), your air conditioners...

Affordable

Portable

Anywhere

The alarm system that follows you everywhere!

The system is pre-programmed and can be immediately installed and used. Completely wireless operation and no AC power is required which means that it can be installed anywhere in minutes and moved easily from one location to another.

Videofied, the only system that truly protects your building sites!

- › Up to 24 cameras per system
- › Battery life: 2 years
- › Indoor and outdoor cameras

Technical characteristics

RF technology	Wiselink	Weatherproof	
Radio type	Bi-directional	Outdoor camera:	IP65
Frequency bands	868/915/920 MHz	Certifications	UL/FCC/CENELEC/
Transmission	AES encryption	CE/EN50131/EN300220/INCERT/IDA/NCP/A-TICK	
Video format	MPEG	Illuminators	High intensity infrared LED
Video size	200 KB	Night vision	
Video Frame Rate	5 per second	Outdoor camera:	8-10 m / 26-33 ft.
Image format	JPEG	Detection	passive infrared with signal analysis
Resolution	320 x 240 pixels	Type of lens	Fresnel
Operating temperature		Detection	passive infrared with signal analysis
Outdoor camera :	-20°/+60°C (-10°/+140°	Detection distance	12 m / 40 ft.
