LiteSUN

PERIMETER
SECURITY LTD

Leading Edge Security for a Modern World

solar panel anti-theft system

Protect your investment!

LiteSUN protects EVERY SINGLE PANEL

How does it work?

A plastic fibre cable runs across your panels and locks them together, like a chain; removing a panel causes an interruption of the fibre, generating an alarm.

- **Easy -** it's a plastic fibre, easy to install
- **Cost Effective -** one device protects up to 500 panels
- **Reliable -** no "false alarms"
- **Secure -** it cannot be removed or bypassed
- **100% EMI Free -** no ground loops, no interference

call 0845 4102 999 today

Which panels produce more?

Polycrystalline?

Monocrystalline?

The ones that don't get stolen!!!

" LiteSUN can be used with any control panel and is compatible with SiteGUARD controls "

When used with a SiteGUARD control panel via a universal SiteGUARD Transmitter, other very useful features are available including;

- ❯ Auto-Set Option (never forget to re-arm!)
- ❯ Silent and Audible modes
- ❯ Simple to operate – iButton key system with activity log
- ❯ Wireless Remote setting point
- ❯ Multiple path comms to Alarm Receiving Centres
- ❯ Self-monitor option available
- ❯ SMS text messaging to mobile phones
- ❯ Battery or mains powered
- ❯ No fixed phone line required
- ❯ Other wireless sensors available including Smoke, Flood, Panic and Motion
